Dear Colleagues,

Please find below an important update regarding the new Fitness Learning Outcomes Framework for Years 7–11, which will be implemented from the beginning of the 2026–2027 scholastic year.

While some of you may not currently teach PE General, I would still encourage you to access the link and review the documentation so that you remain informed of the developments.

Should you have any questions or require clarification, please feel free to contact me, your respective Head of Department, or Mr Stephen Grima directly.

Thank you for your cooperation.

Kind regards,

Robert Portelli

Education Officer (Physical Education & Sport)

Ministry for Education, Sport, Youth, Research and Innovation

MEYR Centre for Physical Education and Sport

Triq Guze Abela Scolaro,

Hamrun

Subject: Update: New Fitness Learning Outcomes Framework (Years 7–11) & Equipment Guidelines for Scholastic Year 2026–2027

Dear Colleagues,

Following the COPE session on Fitness held on 30 April 2026, please be informed that the fitness component for Years 7 to 11 has been updated. This will constitute the new Learning Outcomes Framework (LOF) to be implemented as from the beginning of the scholastic year 2026–2027.

Attached to this communication are the revised fitness module, accompanying schemes of work  [COPE 2026](#), and a number of supporting resources to assist with delivery. Please note that the latest Year 8 and Year 9 schemes will be updated by the end of this week.

Please note the following guidelines for implementation:

- **Adoption of Learning Outcomes:** The new Learning Outcomes (LOs) are to be adopted and followed accordingly.
- **Flexibility in Planning:** The provided schemes of work are intended to serve as a point of reference to outline the expected standard of work. You are not required to follow them rigidly; rather, you are expected to plan, deliver, and adapt lessons to best suit the needs and levels of students within each class.
- **Pedagogical Approach:** This update represents a shift in pedagogy. The Sport Education model is strongly encouraged, as evidence from our pilot project indicates it plays a significant role in supporting student progression and improvement across fitness components.
- **Module Requirements & Test Protocols:** It is highly suggested that each school adheres to the requirements outlined in the *Fitness Module 2026* PDF, particularly regarding the test protocols for the hexagon and shuttle runs.
- **Station & Equipment Preparation:** To ensure smooth implementation from the start of the next scholastic year, schools are suggested to prepare at least 6 to 8 stations for each test. Additionally, schools need to ensure they have the required mats in place for the plank test.

Your cooperation in ensuring the effective implementation of this new framework is greatly appreciated.

Warm regards

Stephen Grima
